Meet Danfoss' full family of mobile A/C hoses

Setting new standards for hose performance, flexibility, and durability in the mobile A/C industry.

Customers today are demanding more from their vehicles A/C system. Every component and system have to work harder and last longer, delivering consistent results mile after mile. Couple that with evolving environmental standards and you have manufacturers wondering how to design vehicles that are both productive and environmentally sustainable.

The answer, the EverCool™ family of high-performance A/C hoses.

Our complete portfolio of EverCool hoses — including the EC007 barrier hose, industry-leading GH001 veneer hose, and FC800 large bore hose — provides options for the full range of mobile A/C applications, including bus, truck, agricultural, military, and construction vehicles. All three hoses in the portfolio are qualified with multiple refrigerants, including R1234yf.

GH001 Hose packaging specifications

Cleveland stocked part numbers

BASE PART #	WR50 (BOX)			WR200 (-16 = WR250) (BOX)		
	TOTAL LENGTH (FT)	MAX # OF PIECES	MIN. LENGTH/PIECE (FT)	TOTAL LENGTH (FT)	MAX # OF PIECES	MIN. LENGTH/PIECE (FT)
GH001-4	50	1	50	200	3	40
GH001-6	50	1	50	200	3	40
GH001-8	50	1	50	200	3	40
GH001-10	50	1	50	200	3	40
GH001-12	50	1	50	200	3	40
GH001-16	50	1	50	200	3	40

Reeled part number format: GH001-4WR50 or GH001-4WR200

Van Wert stocked part numbers

BASE PART #	RL (REEL)		
	TOTAL LENGTH (FT)	MAX # OF PIECES	MIN. LENGTH/PIECE (FT)
GH001-4	500	8	10
GH001-6	560	3	40
GH001-8	575	3	40
GH001-10	560	3	40
GH001-12	367	3	40
GH001-16	250	3	40

Bulk part number format: GH001-4

For Van Wert bulk ordering only (using base part #): Order the quantity of hose desired, in feet, and that is what will ship from Van Wert (cannot guarantee continuous lengths).

Reeled part number format: GH001-4RL

How to use this catalog

Accurate processing and prompt delivery of your order depends on easy identification of your requirements. Order Danfoss parts using correct part numbers as described in this catalog. Inquiries and orders should be directed to your Danfoss distributor.

FC800 and specialty hose packaging specifications

Bulk part number format: FC800-16 / FC555-16 / FC802-16

For bulk ordering in Van Wert (using base part #): Order the quantity of hose desired, in feet, and that is what will ship from Van Wert (cannot guarantee continuous lengths).

General information

Flexible hose lines offer many advantages over rigid tubing including routing ease, vibration absorption, sound deadening, and the ability to accommodate movement of connected components. However, hose lines require caution in use not only to provide long service but also to guard against potentially dangerous failure.

Important

Special care should be taken when selecting the proper refrigerant hose and fittings. The information contained in this bulletin is provided as a general guide to assist in making the appropriate product selection. This guide does not address every parameter that must be considered when selecting a product. The user must make the final product selection in consideration of the user's unique requirements.

Additionally, special care must be taken when working with refrigerant systems. Sudden escape of refrigerant gases may result in blindness or severe injury. Danfoss recommends adherence to the guidelines and

general practices as defined in SAE J2211 for the service and containment of HFC-134a, as well as all applicable EPA guidelines and procedures concerning the service of refrigerant systems.

Danfoss fitting tolerances are engineered to match Danfoss hose tolerances. The use of Danfoss fittings on hose supplied by other manufacturers and/or the use of EverCool hose with fittings supplied by other manufacturers may result in the production of unreliable and unsafe hose assemblies and is not authorized by Danfoss.

DANFOSS SHALL NOT BE SUBJECT TO AND DISCLAIMS ANY OBLIGATIONS OR LIABILITIES (INCLUDING BUT NOT LIMITED TO ALL CONSEQUENTIAL, INCIDENTAL AND CONTINGENT DAMAGES) ARISING OUT OF BREACH OF CONTRACT OR OF WARRANTY OR ARISING FROM TORT CLAIMS (INCLUDING WITHOUT LIMITATION NEGLIGENCE AND STRICT LIABILITY) OR OTHER THEORIES OF LAW WITH RESPECT TO ANY HOSE ASSEMBLIES NOT PRODUCED FROM GENUINE DANFOSS HOSE FITTINGS, HOSE AND DANFOSS APPROVED EQUIPMENT, AND IN CONFORMANCE WITH DANFOSS PROCESS AND PRODUCT INSTRUCTIONS FOR EACH SPECIFIC HOSE ASSEMBLY.

EverCool hose offerings

FC800

EverCool A/C

Exceeds: SAE J3062 / J2064 Type B, Class 1

Construction	Operating parameters	Benefits	Application
Tube Chloroprene (CR) Reinforcement 1 wire braid Cover EPDM	-40 °C to +125 °C (-40 °F to +257 °F) Permeation rate <1.0 kg/m ² /yr (for R134a at 80 °C) Moisture ingress <0.039 g/cm ² /year according to SAE J3062, Class 1 Refrigerant use R134a, R407C, R1234yf; additional refrigerants and refrigerant oils upon request	- FC800 EverCool exceeds the requirements of the SAE J3062 - FC800 has an excellent bend radius, virtually 1/2 of the radius of comparable large bore hoses - Ozone and UV resistant	Metro, large bus, and rail

Part #	Hose I.D.			Hose O.D.		Max. Operating Pressure		Min. Burst Pressure		Min. Bend Radius		Weight		Vacuum Service

EZ Clip System - End connections and O-rings

How to identify O-ring pilot thread sizes

This connection is common to air conditioning systems, both in vehicle and commercial applications. The male and female halves of the connections have a pilot, either long or short. The seal takes place by compressing an O-ring adjacent to the bead of the tube. The threads hold the connection together mechanically.

Inch Size	Dash Size	MALE THREAD O.D. (INCH)			FEMALE THREAD I.D. (INCH)

O-rings packaged separately

EZ Clip System - Aluminum lifesaver

A/C hose repair system

The aluminum lifesaver braze fitting is designed to rework failed OEM aluminum air conditioning tubing and hose assemblies in sizes 10mm to 18mm (metric tubing only, -6 to -12). This repair system allows the installer to reuse unique OEM terminal connections, while replacing the failed OEM hose and nipple with the EZ Clip attachment system.

Note: The EZ Clip system can only be used with Danfoss Aeroquip GH001 hose.

EZ to use

Each kit contains the correct components for replacement of a single hose assembly.

Danfoss Aeroquip GH001 hose must be ordered or purchased separately.

Determine tube OD for Hose ID per chart below:

Standard Configurations

Size *	Tube OD mm (in)	Hose ID mm (in)	Hose Part Number	Use Lifesaver Kit Part Number
-6	10 (.39)	8 (.32)	GH001-6	FF13727-1006
-8	12 (.47)	11 (.42)	GH001-8	FF13727-1208
-10	16 (.63)	13 (.51)	GH001-10	FF13727-1610
-12	18 (.71)	16 (.64)	GH001-12	FF13727-1812

*This (-) size label will be referenced throughout the instructions

EZ Clip System - Ordering and identifying

The EZ Clip System is designed for assembly with Aeroquip by Danfoss GH001 multi-refrigerant hose. The engineered connection exceeds SAE J2064 and has been vibration and impulse tested.

The benefits of EZ Clip are virtually endless:

- No guess work
- No leaking crimps
- No power supply needed
- As easy to use as a pair of pliers
- Easy to use in confined areas

Assembly materials checklist

- Pliers (FT1357)
- Guillotine blade (FT1356) or equivalent cutting tool
- Refrigerant oil compatible with refrigeration or A/C system
- GH001 Multi-Refrigerant hose
- Nipple assembly*
- Appropriately sized clips and cage

**The two black O-rings on the nipple assembly are of a specific rubber compound and size. They should NOT be removed or replaced.*

EZ Clip system components are simple to identify, order, and use

Hose

Cage groove

Clips

EZ Clip System - Assembly instructions

Step 1. Cut the hose

Cut the hose to proper length with an appropriate cutting tool. Aeroquip's hand-held hose cutter (FT1356) has been specially designed for cutting all non-wire reinforced hose, such as GH001 Multi-Refrigerant hose. Be sure the cut is made square to the hose length.

Step 2. Slip on two clips

Install two proper-sized clips onto the cut end of the hose. Orientation of the clips does not affect the performance of the connection. However, for ease of assembly, both clips should have the same orientation.

Note: Failure to slide the clips over the hose at this time will require the clips to be stretched over the hose or fitting later. This may permanently damage the clip.

Step 3. Oil the nipple

Lubricate the nipple with a generous amount of the refrigeration or A/C system's compressor lubricating oil. This **MUST** be done to lower the force of nipple insertion.

Step 4. Insert the nipple into the hose

Insert the nipple into the hose. To ensure that the nipple is fully inserted, check the gap between the cut end of the hose and the shoulder on the nipple. Care should be taken to avoid kinking or other damage to the hose during nipple insertion.

Note: Be sure to wipe excess oil from the nipple and hose.

Step 5. Snap on the cage

Snap the cage into the groove on the nipple. The arms should extend over the hose length. When the cage has been correctly installed in the cage groove, the cage will be able to rotate in the groove. This step **MUST** be performed to ensure:

1. The clips will be located over the O-rings on the nipple.
2. The connection will be compatible with the connection's pressure rating.

EZ Clip System - Assembly instructions

Step 6: Slide the clips

Slide the clips over the cage arms and into the channels on each arm.

Step 7: Close the clips

Use the FT1357 pliers to close the clips. The pliers should be positioned squarely on the clip connection points and should remain square during the closing of the clip.

Nose of the pliers should be firmly seated under the assembly bump and lock latch.

If the pliers are not kept square during closing of the clip, the clasp may have an offset. Use the pliers to correct the clasp alignment.

For easiest assembly, the clasp should be closed between the cage arms.

Correct

Incorrect

Notice

EZ Clip components should not be reused.

EZ Clip System - GH001: Fitting kits

Our most popular EZ Clip fittings are available pre-packed with the needed clips and cages for installation, in a single package.

Crimp **fittings**

757 "E" series - EC007

To determine the correct length of hose, subtract the cut-off factor for each end fitting from the overall length of assembly. All dimensions shown in inches.

Service instruction for replacement of damaged O.E. hose assemblies

Danfoss service port adapters offer an alternative to the high cost of replacement and time out of service which can occur when an air conditioning assembly is damaged. By using the Danfoss adapter, service personnel can remove the damaged end and replace it with a standard Danfoss 757 "E" series hose end used in conjunction with a Danfoss service port adapter. This is a welcome solution to get your customer back on the road without special orders and long delays.

757 "E" series - EC007

757 "E" series air conditioning procedure

The crimp machine system can be used to make original equipment assemblies using factory replacement ends. If the required hose end is not found, our Flareless hose end can be used. By following the instructions on this page, a new hose assembly can be made by combining Danfoss hose end with the original equipment end configuration.

Compensate for tubing being removed by adding to the overall length of the replacement hose assembly.

Preparation – Flareless tube assembly

1. Remove the bad tube assembly or if room permits, perform the cutting procedure in place.
2. Cut the tube squarely and as close to the hose connection as possible.
3. Allow an adequate straight area for the flareless nut and sleeve to move freely for installation purposes.
4. Deburr the inside and outside diameters of the tubing.

Make presetting operation

1. Slide nut and then sleeve onto tube. Shoulder of sleeve must be toward nut.
2. Lubricate threads, seat in hose end, and flareless sleeve with a good grade of lubricant.
3. Insert tube into seat of hose end, making sure that tube is bottomed, **TIGHTEN HAND TIGHT** and then tighten an **ADDITIONAL 1 to 1-1/6 turns** with a wrench.

Accessories

Accessories

Nylon sleeving

Designed for abrasion protection of air conditioning hoses

Features and Benefits

- Easy to cut and assemble
- Tight fit for tight spaces
- Nylon tie straps will hold in place (FF9349-22-150 for all sizes of sleeve)

Hose Sizes	Sleeve Size used for GH001 (Part Number)
GH001-6	FF90224-16
GH001-8	FF90224-16
GH001-10	FF90224-24
GH001-12	FF90224-24

Part Number	Sleeve Will Accept a Maximum O.D. of	Hose with a Minimum O.D. of
FF90224-16	1.12	0.68
FF90224-24	1.93	1.18

Heat sleeving

Designed for heat deflection of air conditioning hoses

Features and Benefits

- Fiberglass reinforced
- Wall thickness .025
- Protects from radiant heat to plus 400 °C (review application with Danfoss Sales Representative)
- Nylon tie straps will hold in place (FF9349-22-150 for all sizes)

FF90356 Reflective Heat Sleeve	Cross Diameter Size (inches)	For GH001 Hose Size
FF90356-01	1.00	-6 and -8
FF90356-02	1.25	-10 and -12
FF90356-04	0.75	-6
FF90356-05	0.62	-4
FF90356-06	1.50	-16

Accessories

Retaining bracket

Mechanical tube brackets

Danfoss’ tube brackets have been designed specifically for a customer’s unique bracketing requirements. The three-piece design begins with an EPDM grommet (figure 4), which minimizes tube friction, and “locks” the bracket onto the tube. This design withstands vibration in the toughest of environments, without slippage, and offers ease of fit up, that is often difficult with welded brackets. To complete the assembly, the bracket connection

is the customer’s design, and the bracket retainer, or bracket top, is sized for a specific tube O.D.

To install the assembly, the bracket top and bracket bottom, lock into place, with the ease of a flange screw.

Part numbers for the grommet, bracket top and flange screw are shown in the chart below. A sample of the connecting bracket, is shown in figure A.

Contact your Danfoss Sales Representative, or Danfoss Applications Team to discuss additional designs that are currently available, or the opportunity to support a new design for your specific application.
